* BIOS 282 is offered only during Spring semester.

Note: Students who have not had two years of the same foreign language in high school must take four units to fulfill their language requirement (see Biola catalog for details).

It is possible to make the load lighter each semester if courses are taken during Interterm or Summer Session.

The eight units of general education math/science requirement are met by the completion of the major.

NOTE: This curriculum chart is designed with your major department and is one way that the classes will work out properly in sequence for your major. However, there are alternative flexible ways to rotate some of the classes within the same year/level and sometimes between year levels. Please contact your major department advisor to discuss flexible alternatives in scheduling the sequence of your classes.

Use the unit value as recorded on your last copy of transfer evaluation.
